EDUCATION

BRAC University **Dhaka, Bangladesh**

B.Sc. in Computer Science and Engineering, CGPA: 3.77/4.00 *September 2022 – October 2026*

TECHNICAL SKILLS

Languages: JavaScript, Python, C/C++

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, REST API Development

ML / Data: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, Jupyter Notebook

Database: MongoDB, MySQL

Tools: Git, GitHub, Vercel

Core Concepts: Supervised Learning, Data Preprocessing, NLP, RAG

WORK EXPERIENCE

Coding Instructor **Remote**

Codingal *September 2026 – Present*

- Teach live online coding classes to K-12 students on Codingal's virtual classroom platform.
- Deliver courses in Scratch, Python, and web development.
- Adapt lessons to student grade level, from block-based coding in Scratch to text-based Python and web development.

PROJECTS

MatchFinder - Matrimonial Platform Live Project GitHub

- Streamlined user matchmaking in matrimonial platforms by building a full-stack app with secure JWT-based authentication, an admin approval workflow, and advanced user filtering.
- *Tech Stack: React.js, Node.js, Express.js, MongoDB, TailwindCSS*

Review-Hub - Product Review Platform Live Project GitHub

- Solved the challenge of managing unverified product feedback by creating a secure platform with JWT-based roles and REST APIs for real-time review submissions and rating aggregation.
- *Tech Stack: React.js, Node.js, Express.js, MongoDB, TailwindCSS*

Predicting Career Changes - ML Classification GitHub

- Addressed the problem of unpredictable employee attrition by performing exploratory data analysis and training multiple classifiers on HR data to identify key factors influencing career changes.
- *Tech Stack: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn*

Yahoo Answers Topic Classification - NLP Text Classifier GitHub

- Tackled the challenge of automatic topic categorization in large text datasets by developing and benchmarking ML and deep learning models on over 460,000 samples to achieve high-precision classification.
- *Tech Stack: Python, TensorFlow/Keras, Scikit-learn, Gensim, NumPy, Pandas, KerasTuner*

CERTIFICATIONS

- Complete Web Development Course (MERN Stack) – Programming Hero
- Quantum Computing Fundamentals – The Coding School
